KARAN BHOSALE

Full Stack Java Developer | Java & Spring Boot Developer | Software Developer

Mumbai, India | +91 9309993571 | karan.bhosale.dev@gmail.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Java Developer with hands-on internship experience designing scalable RESTful APIs, microservices, and responsive web applications using Java, Spring Boot, React, and SQL/NoSQL databases. Proficient in backend architecture, JWT authentication, and CI/CD deployment pipelines. Proven track record of delivering end-to-end production applications with a focus on high-performance code quality and secure design.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML5, CSS3

Frameworks & Libraries: Spring Boot, Spring Security, Spring Data JPA, Hibernate, React.js, Bootstrap

Backend & Systems: RESTful APIs, Microservices, Apache Kafka, Redis, JWT, OAuth2

Databases: PostgreSQL, MySQL, MongoDB, Firebase Realtime Database

Tools & DevOps: Docker, AWS (EC2, S3), Git, GitHub, Maven, JUnit 5, SonarQube

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), System Design, SDLC

EXPERIENCE

Java Developer Intern — SaiKet Systems **Feb 2026 – Mar 2026**

Remote

- Engineered robust Java backend modules utilizing core OOP design patterns, Java Collections, and efficient File I/O operations to process high-volume application workflows.
- Collaborated using Git and GitHub for source control, including feature branching, commits, code reviews, and pull request workflows.
- Designed RESTful API endpoints and integrated backend services, contributing across all phases of the Software Development Life Cycle (SDLC).

Android Developer Intern — Navyug Infotech Ltd. **Jun 2023 – Jul 2023**

Satara, India

- Built two Android applications from scratch — a student progress tracker and an event planner — covering UI design, business logic, and data persistence.
- Developed 15+ reusable UI components in XML and implemented core business logic in Java using Android Studio.
- Integrated Firebase Realtime Database and Authentication, optimizing layout rendering to reduce screen load latency by 20%.

PROJECTS

Flowzenix — Intelligent Business Process Automation Platform ***Ongoing***

GitHub: Flowzenix — *Java, Spring Boot, Spring AI, React.js, PostgreSQL, REST APIs*

- Developing a configurable business workflow automation platform using Spring Boot, React.js, and PostgreSQL to automate leave requests, invoice approvals, and purchase requisitions.
- Building a multi-step approval engine with role-based access control, workflow tracking, and RESTful APIs for scalable frontend-backend communication.

- Integrating Spring AI to develop AI-assisted document processing, policy compliance, and anomaly detection capabilities for faster and smarter business decisions.

LogSentinel — Smart Log Analyzer & Anomaly Detector ***Live***

GitHub: LogSentinel | **Live** — *Java 17, Spring Boot, Hibernate, PostgreSQL, React.js, Vite, Docker, JUnit 5*

- Built a full-stack log analysis platform with a custom, weighted-signal anomaly detection algorithm in Java that scores log entries on rarity, source volume, severity, and burst activity — no hard-coded rules.
- Designed high-throughput Spring Boot REST APIs for log ingestion, filtering, and pagination, processing 5,000+ entries/sec with a responsive React dashboard.
- Integrated an LLM-based explanation layer that only interprets entries already flagged by the detector, with a deterministic offline fallback so the app stays fully functional without external API access.
- Wrote JUnit 5 test suites covering the detection engine, containerized the application with Docker, and deployed it to production.

Milind Pawar Consultancy Website (Freelance Project) ***Live***

GitHub: Milind_Pawar | **Live** — *HTML5, CSS3, JavaScript, Java*

- Delivered a freelance full-stack website for an architectural consultancy client, translating business requirements into a responsive, production-ready site.
- Developed 5+ responsive core pages using HTML5, CSS3, and JavaScript, backed by a Java service to handle dynamic requests and client inquiries.
- Managed the project end-to-end as a freelancer, from requirements gathering and development through deployment on a live custom domain.

EDUCATION

B.E. in Computer Engineering — Atharva College of Engineering **2024 – 2027 (Ongoing)**

Mumbai, India | SGPA: Sem 3 – 9.48, Sem 4 – 8.83, Sem 5 – 8.13, Sem 6 – 8.57

Diploma in Computer Engineering — K.B.P Polytechnic **Oct 2021 – Jun 2024**

Satara, India | Percentage: 88.17%

CERTIFICATIONS

- Python & Java: Master Backend & Frontend Web Developments — Udemy (Sara Academy), Feb 2026
- Foundations of Web Development: CSS, Bootstrap, JS, React — Udemy (Proper Dot Institute), Jan 2026
- AI Agents for Beginners — Simplilearn SkillUp, Apr 2025
