SUMMARY

B.E. Computer Engineering student (graduating May 2027) who builds Java 17 and Spring Boot backends with React frontends. Deployed LogSentinel, a log analyzer with a React dashboard and a custom anomaly-detection engine whose REST APIs processed 5,000+ entries/sec. Java Developer intern (Feb-Mar 2026) and freelance developer with a live client site. Seeking software developer, Java backend and Java full stack internship and entry-level roles.

TECHNICAL SKILLS

Languages: Java 17, SQL, JavaScript, Python
Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT, JUnit 5
Frontend: React.js, Vite, HTML5, CSS3, Bootstrap
Databases: PostgreSQL, MySQL, MongoDB, Firebase Realtime Database
DevOps / Tools: Docker, Git, GitHub, Maven, SonarQube, AWS (EC2, S3 - fundamentals)
Familiar with: Kafka, Redis, OAuth2, Microservices
Core: Data Structures & Algorithms, OOP, SDLC

PROJECTS

LogSentinel - Smart Log Analyzer & Anomaly Detector (Deployed)
Java 17, Spring Boot, Hibernate, PostgreSQL, React.js, Vite, Docker, JUnit 5 | *GitHub* | *Live Demo*
- Engineered Spring Boot REST APIs for log ingestion, filtering and pagination that processed 5,000+ entries/sec, feeding a responsive React dashboard.
- Designed and implemented a custom weighted-signal anomaly detection engine in Java that scores entries on rarity, source volume, severity and burst activity, without hard-coded rules.
- Integrated an LLM explanation layer that only interprets entries already flagged by the detector, with a deterministic offline fallback so the app works without external API access.
- Authored JUnit 5 test suites for the detection engine, containerized the application with Docker and deployed it live.

Flowzenix - Business Workflow Automation Platform (In Development)
Java, Spring Boot, Spring AI, React.js, PostgreSQL | *GitHub*
- Developing a configurable multi-step approval engine with role-based access control and workflow tracking for leave requests, invoice approvals and purchase requisitions.
- Exposing RESTful APIs for the React frontend and integrating Spring AI for document processing, policy compliance checks and anomaly detection.

Milind Pawar Consultancy Website - Freelance (Deployed)
HTML5, CSS3, JavaScript, Java | *GitHub* | *Live Site*
- Delivered a responsive 5+ page website for an architectural consultancy client, backed by a Java service that handles dynamic requests and client inquiries.
- Owned the project end to end: requirements gathering, development and deployment on a live custom domain.

EXPERIENCE

Java Developer Intern - SaiKet Systems (Remote) Feb 2026 - Mar 2026
- Developed Java backend modules applying OOP design patterns, Collections and File I/O to process application workflows.
- Designed RESTful API endpoints and integrated backend services as part of the SDLC.
- Collaborated in a feature-branch Git/GitHub workflow using pull requests and code reviews.

Android Developer Intern - Navyug Infotech Ltd. (Satara) Jun 2023 - Jul 2023
- Developed and shipped 2 Android apps (student progress tracker, event planner) covering UI, business logic and data persistence, with Firebase Auth and Realtime Database.
- Developed 15+ reusable XML UI components and cut screen load latency by 20% through layout optimization.

EDUCATION

B.E. Computer Engineering - Atharva College of Engineering, Mumbai Jul 2024 - May 2027 (Expected)
Average SGPA (Semesters 3-6): 8.75

Diploma, Computer Engineering - K.B.P Polytechnic, Satara Oct 2021 - Jun 2024
Percentage: 88.17%

CERTIFICATIONS

Python & Java Backend/Frontend Web Development - Udemy (Feb 2026)
Foundations of Web Development: CSS, Bootstrap, JS, React - Udemy (Jan 2026)
AI Agents for Beginners - Simplilearn SkillUp (Apr 2025)
